exercised, is a County prerogative, and not a right of the vendor. This prerogative will be exercised only when such continuation is clearly in the best interest of the County.

Should the vendor decline the County's right to exercise the option period, the County may consider the vendor in default which may affect that vendor's eligibility for future contracts.

In their best interest, the M-DWASD may request quotations for a specific order, for a specified period of time (where orders may be placed at a later date, as needed), or to satisfy stock requirements. The award of the order to one vendor does not preclude the ability of the remaining pre-qualified vendors from submitting offers for other orders as requested by the M-DWASD.

In the best interest of the County, for items either delivered by the vendor or picked-up from the vendors by authorized County personnel, the availability of the material, geographic location and/or delivery time may be utilized as deciding factors for the basis of an award to a vendor when it is determined by the County department that a project is time sensitive to meet pre-established deadlines or it is an emergency situation.

It shall be the sole prerogative of the County as to the total amount of awarded vendors on this contract. During the term of this contract, the County reserves the right to receive or re-evaluate submittals, add vendors, add or delete products, or delete vendors, as it deems necessary.

The bidder hereby acknowledges and agrees that all materials, except where recycled content is specifically requested, supplied by the bidder in conjunction with this bid shall be new, warranted for their merchantability, and fit for a particular purpose. In the event any of the materials supplied to the M-DWASD by the vendor are found to be defective or do not conform to specifications, the M-DWASD reserves the right to (1) cancel the order and return such materials to the vendor at the vendor's expense or (2) require the vendor to replace the materials at the vendor's expense.

2.28 PACKING SLIP/DELIVERY TICKET TO ACCOMPANY ITEMS DURING DELIVERY: SECURITY REQUIREMENTS FOR THE M-DWASD

On April 23, 2002, the Miami-Dade Board of County Commissioners approved Ordinance No. 02-68 entitled "Provide Rules and Regulations Governing Security at the Miami-Dade Water and Sewer Department (M-DWASD) Facilities" which created Article IX of Chapter 32 of the Miami-Dade Code. In accordance with the Ordinance, the standard procedures for receiving cartons/boxes/packages, etc. have been adjusted as follows:

2.28.1 Items Delivered by the Awarded Vendors

SECTION 2
SPECIAL CONDITIONS

The vendors must enclose a complete packing slip or delivery ticket with any items to be delivered in conjunction with this solicitation. The packing slip must include, at a minimum, the following information: the purchase order number; the date of the order; the M-DWASD requisition number, a complete listing of items being delivered; and, if authorized, the back-order quantities with their estimated delivery date.

Failure to prepare and enclose packing slips with the items in the prescribed manner may result in the shipment being refused and ordered off the property by the facility's security forces. The M-DWASD shall not be responsible for delays, redelivery fees, restocking fees or any other cost incurred by noncompliance with these requirements.

2.28.2 Items Delivered for the Awarded Vendors by the US Mail or a Private Carrier, e.g. US Postal Service, Federal Express, Carolina Freight, etc.

The vendors must enclose a complete packing slip or delivery ticket with any items to be delivered in conjunction with this solicitation, for the vendor by a private carrier. The packing slip must be enclosed with the shipping cartons, which contain the items being delivered. The packing slip must include, at a minimum, the following information: the purchase order number; the date of the order; the M-DWASD requisition number, a complete listing of items being delivered; and, if authorized, the back-order quantities with their estimated delivery date. In addition, the vendors must print the purchase order number and the M-DWASD requisition number in an obvious prominent space in the "Ship to" portion of the private carriers receipt ticket/mailling ticket/bill of lading. This action will allow the storeroom personnel to immediately identify the items being delivered. If there is any question regarding the carrier's receipt ticket, the vendor's packing slip enclosed with the items being delivered can be immediately examined.

Failure to include the purchase order number and the M-DWASD requisition number on the carrier's receipt ticket and to enclose the packing slip to the items being delivered in the prescribed manner may result in the shipment being refused and ordered off the property by the facility's security forces. The M-DWASD shall not be responsible for delays, redelivery fees, restocking fees or any other cost incurred by noncompliance with these requirements.

2.29 PATENTS AND ROYALTIES

The vendor, without exception, shall indemnify and save harmless the County and its employees from liability of any nature or kind, including cost and expenses for or as a result of any copyrighted, patented, or unpatented invention, process, or article manufactured by the vendor. The vendor has no liability when such claim is solely and exclusively due to the combination, operation or use of any article supplied hereunder with equipment or data not supplied by vendor or is based solely and exclusively upon

SECTION 2
SPECIAL CONDITIONS

the County's alteration of the article. The purchaser will provide prompt written notification of a claim of copyright or patent infringement.

Further, if such a claim is made or is pending, the Vendor may, at its options and expenses, procure for the purchaser the right to continue use of, replace or modify the article to render it non-infringing. (If none of the alternatives are reasonably available, the County agrees to return the article on request to the contractor and receive reimbursement, if any, as may be determined by a court of competent jurisdiction.) If the vendor uses any design, device, or materials covered by letters, patent or copyright, it is mutually agreed and understood without exception that the bid prices shall include all royalties or cost arising from the use of such design, device, or materials in any way involved in the work.

2.30 PURCHASE OF ANCILLARY ITEMS

Although the County has identified units, equipment, parts, service and installation for Liquid Level Control Systems as the items to be purchased from this contract, there may be ancillary items that must be purchased during the term of this contract. Under these circumstances, a M-DWASD representative will contact the contract vendors to obtain price quotes for the ancillary items. The County reserves the right to award these ancillary items to a contract vendor based on the lowest price quote or to bid the items through a separate solicitation.

2.31 REPAIRS AND PARTS MANUALS TO BE PROVIDED

The successful vendor shall supply the County with a minimum of two (2) comprehensive repairs and parts manuals which identify the component parts and which describe the appropriate process for repairing the equipment purchased by the M-DWASD in conjunction with this bid solicitation. The manuals shall be supplied prior to, or upon, delivery of the equipment. Final payment shall be withheld until such time as these manuals are received by the M-DWASD.

2.32 SERVICE FACILITIES IN SOUTH FLORIDA SHALL BE PROVIDED BY BIDDER

Bids will only be accepted from bidders which have service facilities located in South Florida (defined as Dade, Broward, Palm Beach and Monroe Counties) which can provide prompt field service, parts and repairs on a timely manner if so required.

2.33 AVAILABILITY OF CONTRACT TO OTHER COUNTY DEPARTMENTS

Although the requirements in this solicitation are specific to the M-DWASD, it is hereby agreed and understood that any County department or agency may avail itself of this contract and purchase any and all items specified herein from the pre-qualified vendors. Under these circumstances, a separate purchase order shall be issued by the County department which identifies the requirements of the additional County department or

SECTION 2
SPECIAL CONDITIONS

agency. The vendor shall be responsible for obtaining the necessary delivery and invoicing information from the County department or agency.

2.34 EMERGENCY SERVICE

The successful bidder shall provide 24 hours, 7 days a week Emergency Service to the M-DWASD under the contract. The Emergency Service shall be defined as a non-warranty related repair service requirement and its response time shall not exceed twenty-four (24) hours after notification by the M-DWASD.

2.35 REPLACEMENT PARTS

Replacement parts shall be purchased on an as needed, when needed basis. All parts supplied by the vendors shall be new and must be of Original Equipment Manufacture (OEM) as recognized by the equipment manufacturer.

2.36 CLEAN-UP

Vendors shall be responsible for the proper disposal of all debris resulting from the on-site installation or repairs of equipment. Vendors shall maintain a clean and safe work area at all times. If applicable, all work equipment and tools shall be stored in an area designated by M-DWASD when not in use.

SECTION 3

TECHNICAL SPECIFICATIONS

- RS-232 serial port for SCADA and P.C. interfacing.

M-DWASD reserves the right to determine the equivalence and acceptability of any proposed system.

All components of the control system shall be designed for use in wastewater collection systems and must be compatible with the harsh environment normally associated with this type of application.

The manufacturer of the system shall present conclusive evidence to demonstrate their liquid level controller systems have satisfactorily sustained extensive testing and development under conditions existing at sewer pump stations and have operated satisfactorily at least fifty (50) sewer pump station applications for a minimum of two (2) consecutive years.

The system shall not include any mercury manometers or other components containing liquid mercury. The sole exception to this requirement is the use of float switches for backup controls and alarms.

3.2 GENERAL DESCRIPTION

The Lift Station Control System shall be a fully automatic controller with the following general requirements:

1. - The system shall control the available water pumps to maintain the liquid level within the limits determined for each station by the Water and Sewer Department. These limits shall be easily changed from the front panel of the controller.
2. - The system shall measure the liquid level in the wet well using an air bubbler with dual air compressors, air tank, and automatic purging, (blow down).
3. - The system shall detect and enunciate anomalous conditions in the lift station such as high water alarm, and air system failure.
4. - The system shall upon detecting self-malfunction automatically switch to back up float control and provide a malfunction alarm signal.

3.3 WATER PUMP CONTROLS

The control system shall be designed to control the water pumps using relays connected to motor starters. The pumps shall be operated in a lead/lag mode with the turn-on and turn-off points for each pump individually programmable from the front panel. A pump alternator shall be provided which can be enabled or disabled from the front panel. The wet well level is measured by the bubbler system. When the wet well level exceeds the lead channel on setpoint, the first pump is turned on. Normally this pumps the well level

SECTION 3

TECHNICAL SPECIFICATIONS

down to the lead channel off setpoint and the pump turns off. If the lead pump cannot handle the water flow, the level in the wet well will continue to rise until it reaches the lag channel on setpoint, at which time the lag pump also turns on. This process continues for all available pumps. If the alternate switch is on, then a different pump will be assigned as lead pump on each cycle. Each pump shall have an external disable in-put switch. If a pump is disabled, the system shall automatically call another pump as the lead pump. A high level alarm shall be built-in with their setpoints programmable from the front panel.

3.4 BUBBLER SYSTEM CONTROL

The control system shall measure the depth of water in the wet well and display it in inches or feet of water using an air bubbler system. The bubbler system shall be powered by two intermittent duty rated air compressors, which shall be alternatively energized to charge up an air tank, which shall supply the air for the bubbler. The air compressor shall only be on for the short period of time required to maintain pressure in the air tank and shall be alternated to equalize wear. Air from the air tank shall be sent to the bubbler tube through a flow-regulating device and the backpressure in the bubbler tube shall be measured by a pressure transducer to determine water depth. The system shall be designed to detect failures in the bubbler system, which would prevent proper operation. Detection of this system's failure shall illuminate a front panel lamp and be capable of automatically switching to an optional one or two float backup system(s).

3.5 AIR COMPRESSORS

The system shall include two piston type air compressors; Vibrator diaphragm compressors, (fish tank compressors), shall not be used. The compressors shall be selected for long life under intermittent duty and shall require no periodic lubrication. The compressors are used to charge an air tank and are alternately called on to replace the air used by the bubbler tube. A system shall be provided to detect the failure of either of the compressors a switch from one to the other. Indicators shall be provided on the front panel to indicate the failure of each compressor.

3.6 FLOW REGULATOR SYSTEM

The flow regulator system regulates the flow of air from the air tank to the bubbler tube. It shall provide a minimum of 2000 SCCM, (standard cubic centimeters per minute), of air to the bubbler tube. The system shall include an air filter to prevent the regulator from becoming blocked by dust and shall also include an automatic purging, (blow down), system for keeping the bubbler tube clear of blockages. This system shall use an air solenoid to vent the entire contents of the air tank to the bubbler tube. The depth measurement shall be frozen during this process to prevent erroneous reading and improper pump calls. The system shall be designed so that the purging process does not over pressurize the bubbler pressure transducer. The purging process shall be initiated in any one of four ways:

SECTION 3
TECHNICAL SPECIFICATIONS

1. - The controller shall be designed to periodically initiate a purge. The interval between these purges shall be set using the front panel for a purge interval of between 1 and 10 hours.
2. - The controller shall be designed to initiate a manual purge from the front panel.
3. - The controller shall include a system to measure the air flow in the bubbler tube. If the air flow drops below 50% of normal flow, an automatic purge shall be initiated.
4. - The controller shall initiate a purge upon power-up so that after a power loss, the unit will automatically purge.

The system shall have the capability to display the relative bubbler system air flow.

3.7 ALARMS

The controller shall be designed to detect and indicate the following conditions:

1. - Self-diagnose failure and inoperative condition. It shall have a high water and low water alarm systems. The high and low setpoints shall be entered from the front panel and be easily changed in the field. If the water level exceeds the high alarm setpoint, then an indicator will light and a relay contact will close. If the water level is less than the low alarm setpoint then the low alarm indicator will light and a relay contact will close. Alarms shall reset automatically upon restoration of normal operating levels. Manual reset of high or low level alarms shall not be necessary. In case of power failures, the controller shall return to normal operation once power is restored, without requiring manual reset from an operator.
2. - The controller shall detect the failure of either of the air compressors and illuminate the associated air compressor fail light.
3. - The controller shall detect failures which prevent the air system from proper operation and display this condition on a system error light.

3.8 PACKAGING REQUIREMENTS

The control and bubbler system shall be a standard integrated package, the existing and proven product of a recognized pump controller manufacturer. Its size shall not exceed one (1) cubic foot. The controller and bubbler shall be a modular unit so that it can be easily retrofitted into existing panels or moved from existing panels to new ones.

SECTION 3
TECHNICAL SPECIFICATIONS

3.9 SPARE PARTS AND IN-SHOP REPAIRS

The control system supplier shall provide a recommended spare parts lists with recommended stocking levels in order to enable M-DWASD to properly maintain the system. The supplier shall offer these parts as a package. Vendors shall also provide alternate sources for repairs by offering an in-shop repairs service and/or a parts exchange program. Conditions for these services (i.e. labor charge, parts cost and mark up) must be listed in the vendor's quote.

3.10 TRAINING

The control system supplier shall make available to WASD personnel the necessary training to support occasional equipment installation, and operation and maintenance of the above specified equipment. The quantity of personnel to be trained shall be agreed upon at a later date. Conditions for these services (i.e. labor charges, cost of educational materials and mark up) must be listed in the vendor's quote.
